

This feature allows Full Frame accounts to use a sub-domain of their company's domain name as the address for the Admin Center, Client Center, and Property Websites generated using this platform. This feature requires a \$125/yr fee for setup and purchase of a security certificate. This is not a required feature, but lends itself to a mature business presence. The setup instructions below assume that you want to use the subdomains of "admin", "client", and listing".

**Configuring Your Domain Name** - You'll need to access your domain registrar and/or hosting account in order to complete this step. There are many registrars on the market. We will be using MadDog Domains in the example below.

## Client Center Domain

1. Click to edit your domain name and then "Manage DNS" for the domain name you wish to use.

## Additional Settings

**i** Never risk losing your domain. Add Domain Ownership Protection to prevent accidental or malicious loss. [Learn more](#)

Automatically renew your domain with your card on file so you never lose your domain.

Auto renew: **On** [Edit](#)

Locking prevents unauthorized changes, including transfer to another registrar.

Domain lock: **On** [Edit](#)

[Manage DNS](#)

[Transfer domain to another Mad Dog Domains account](#)

[Transfer domain away from Mad Dog Domains](#)

[Get authorization code](#)

[Delete domain](#)

2. Under "Records", Add a New Record
3. Select "CNAME" under Type heading
4. In the Host Field, type CLIENT
5. In the "Points to Field, type CLIENT.GOFULLFRAME.COM

## Admin Center Domain

6. Under "Records", Add a New Record
7. Select "CNAME" under Type heading
8. In the Host Field, type ADMIN
9. In the "Points to Field, type PROADMIN.GOFULLFRAME.COM

A screenshot of a web form for adding a new DNS record. The form has four main sections: "Type", "Host", "Points to", and "TTL". Each section has a red asterisk icon next to its label. The "Type" dropdown is set to "CNAME". The "Host" text field contains "admin". The "Points to" text field contains "proadmin.gofullframe.com". The "TTL" dropdown is set to "1 Hour". At the bottom right, there are two blue buttons: "Save" and "Cancel".

<b>Type *</b>	<b>Host *</b>	<b>Points to *</b>
CNAME	admin	proadmin.gofullframe.com
<b>TTL *</b>		
1 Hour		
		<b>Save</b> <b>Cancel</b>

## Property Website Domain

10. Under "Records", Add a New Record
11. Select "CNAME" under Type heading
12. In the Host Field, type LISTING
13. In the "Points to Field, type LISTING.GOFULLFRAME.COM

A screenshot of a web form for adding a new DNS record, similar to the one above. The "Type" dropdown is set to "CNAME". The "Host" text field contains "listing". The "Points to" text field contains "listing.gofullframe.com". The "TTL" dropdown is set to "1 Hour". At the bottom right, there are two blue buttons: "Save" and "Cancel".

<b>Type *</b>	<b>Host *</b>	<b>Points to *</b>
CNAME	listing	listing.gofullframe.com
<b>TTL *</b>		
1 Hour		
		<b>Save</b> <b>Cancel</b>

- 
14. When finished, contact us at [info@gofullframe.com](mailto:info@gofullframe.com) and we will complete the setup.
